

# Biomass Boiler Workshop

## November 1 and 2, 2023

### Montréal, Canada

## Biomass Boiler Workshop in Eastern Canada

For almost 25 years, the Biomass Boiler Workshop has provided a unique opportunity for representatives from the Pulp and Paper, Forest Products, Food Industries, Power Sector, Independent Power Producers, and Energy-from-Waste Industries to learn and network. In November, we are excited to bring our workshop to the beautiful city of Montréal!

The workshop consists of presentations on the latest technological developments that have improved the operating performance, burning capacity, efficiency, and fuel firing flexibility of biomass and other solid fuel fired boilers.

### Participants will:

- 🔥 Learn about the latest retrofit technology for biomass and other solid fuel fired boilers and associated equipment.
- 🔥 See how other plant operations solve their boiler area problems.
- 🔥 Receive information and solutions for specific needs.

The Workshop is sponsored by

Over the last 47 years, Jansen has upgraded the performance of over 125 biomass and other solid fuel fired boilers in various industries. These upgrades have achieved:

- 🔥 Increased fuel firing capacity.
- 🔥 Reduced fossil fuel firing and lowered carbon footprint.
- 🔥 Improved emissions performance (CO, NO<sub>x</sub>, VOC, particulate matter).
- 🔥 Reduced unburned char carryover and lowered unburned losses.
- 🔥 Reduced erosion by limiting ash carryover.
- 🔥 Improved heat capture to increase power generation rates, lower stack gas exit temperatures, and increased thermal efficiency.
- 🔥 Compliance with regulatory emissions.

Attendance to the Workshop is **FREE OF CHARGE** but space is limited

**Our Workshops fill up quickly!**

**An early sign-up is required to guarantee your spot.**

To sign up and to receive a detailed program, workshop location, hotel information, etc., please contact **Cathy Thomas**
